

***Hit a Draw with Greater Ease.
Not to Mention Greater Distance.***

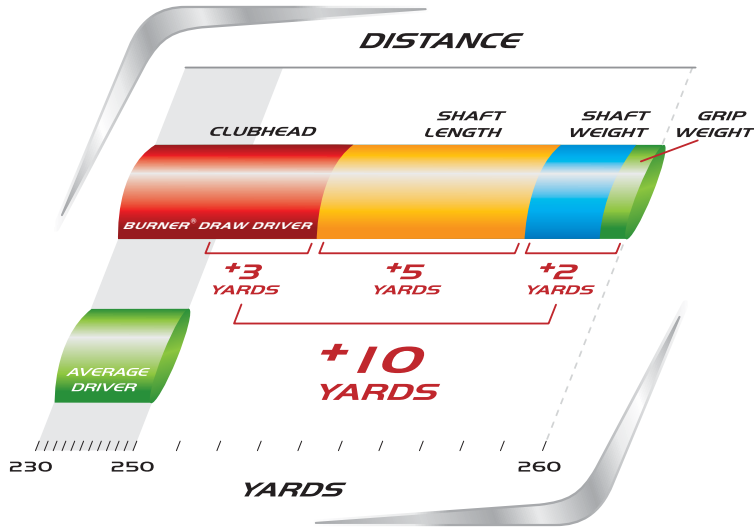

The Burner Draw driver incorporates more slice-correcting features, including our Draw-Weighted Technology, than any other TaylorMade driver, making it the ideal club for golfers – especially slicers – who need help hitting longer and straighter drives.

FEATURE	ADVANTAGE	BENEFIT
Draw-Weighted Technology	Weight is moved from the toe to the back-heel area of the clubhead	Easier to square the face at impact, promoting a distance-enhancing draw
SuperFast Technology	Extremely light total weight with light-and-long shaft	Promotes faster swing speed for added drive-crushing power
460 cc titanium clubhead with high MOI and Inverted Cone Technology	Maximum effective MOI (eMOI)* exceeding 5800	Unsurpassed forgiveness for long, straight results on off-center hits
Bullet-shaped clubhead with sleek crown markings	Fast and distinctive look at address	Promotes increased confidence and speed

* Effective MOI (eMOI) is the positive influence on ball speed on off-center hits that's exerted by the combined effects of a driver's MOI and clubface technology (versus constant-thickness clubfaces). eMOI in TaylorMade drivers is dramatically higher, and more valuable in terms of its affect on ball speed, than MOI alone, owing to the benefits of TaylorMade's patented Inverted Cone Technology.
