

 **TaylorMade®**

CUSTOM COMPONENT OPTIONS

FEATURED CUSTOM SHAFT & GRIP OPTIONS

TaylorMade's industry-leading custom component program allows golfers to select from a plethora of both shaft and grip combinations from many of the industry's leaders in innovation and technology for a fully personalized experience. The featured components below are rising in popularity both on professional tours around the world as well as with consumers. We highly recommend you start your path to complete customization by referring to the Custom Shaft and Grip Options booklet for an in-depth look at all of our customization options.

METALWOOD SHAFTS

ALDILA ROGUE MAX

"Rogue MAX offers unmatched performance and consistency through the use of advanced aerospace materials and an innovative design," said John Oldenburg, Aldila's Vice President of Engineering and Product Development. "The Rogue MAX incorporates advanced materials and a unique 0/90 carbon fiber multi-axial weave that provides consistency and stability characteristics never before available in a golf shaft."

MITSUBISHI RAYON TENSEI™ CK PRO WHITE

TENSEI™ CK Pro White expands the TENSEI™ CK Series – which features a multi-material design that incorporates more performance-oriented materials than we've ever used in a shaft. Building off of the classic tip-stiff, low-launch bend profile preferred by stronger players the TENSEI™ CK Pro White incorporates the same Carbon Fiber/DuPont™ Kevlar® (CK) weave in the butt-section as the Pro Blue – providing enhanced stability and maximum feel. This series also incorporates High Modulus, premium 40 Ton prepreg throughout the shaft. A Boron-reinforced tip-section delivers lower torque, and promotes our preferred control and stability.

GRAPHITE DESIGN TOUR AD TP

The new Tour AD TP shaft has a medium stiffness starting at the handle thru the mid-section of the shaft and a stiff tip profile to promote a mid/high launch condition and low spin. The new Tour AD TP also utilizes the latest in graphite material from Toray Industries, Inc., TORAYCA® T1100G carbon-fiber pre-preg with NANOALLOY® technology in the tip section of the shaft for additional shaft stability, exceptional feel and precise ball control.

KBS TOUR GRAPHITE HYBRID PROTOTYPE

Inspired and designed from the KBS Tour shaft, the most popular steel shaft in the KBS Golf Shaft line, the KBS Tour Graphite Hybrid Prototype offers KBS signature feel, but finally in a graphite shaft model.

Offering performance and stability throughout the entire make of the shaft which lets the player hit more aggressive, longer, and consistent shots for hybrid clubs. KBS will be the first shaft brand to create seamless performance transition from your Graphite Hybrid shafts, to your KBS Iron shafts. Available in 95-X, 85-S and R V

GRIPS

LAMKIN Z5

The new Z5 features five distinctive grip zones scientifically engineered to promote proper hand placement and the ideal light pressure grip with every swing. The grip's multi compound foundation is combined with a functional network of textures and patterns to deliver enhanced comfort, control and consistency.

IRON / WEDGE SHAFTS

KBS \$-TAPER

The KBS Tour \$-Taper shares the same bend profile as the KBS TOUR with elongated step patterns for spin, generating a stable performance throughout the swing. KBS Tour \$-Taper provides superior feel while maintaining shot workability and tight dispersion for players seeking the ultimate tour shaft with Mid trajectory and Low Spin performance.

The KBS Tour \$-Taper will be offered in a Black PVD. Stiff will be 120g, and X will be a 130g.

NIPPON N.S. PRO MODUS³ TOUR 105

The all new N.S. PRO MODUS³ Tour 105 - lighter weight to increase club head speed for longer distances, straighter shots, stronger trajectory, and more consistent performance! The N.S. PRO MODUS³ Tour 105 was first brought out on tour as the N.S. PRO MODUS³ PROTO ST in 2010 and was immediately put in play. The PROTO ST was in the winning bags of eight professionals upon its launch and has become the second most popular MODUS³ iron shafts on tour, just behind the N.S. PRO MODUS³ Tour 120.

- Traditional, smooth bend profile.
- Mid-spin, mid-flight.

PROJECT X LZ

Project X LZ steel features proprietary Loading Zone Technology which produces maximum shaft load during the downswing for 7% greater energy transfer to the ball at impact for more distance.

Loading Zone Technology is achieved through variable wall technology in the shaft's butt and tip sections and a reduced stiffness in the midsection. Golfers can not only feel the technology, but see it as well in the rapid, tapered steps out of the grip through the midsection of Project X LZ.

RECOIL 460 AND 450 ES

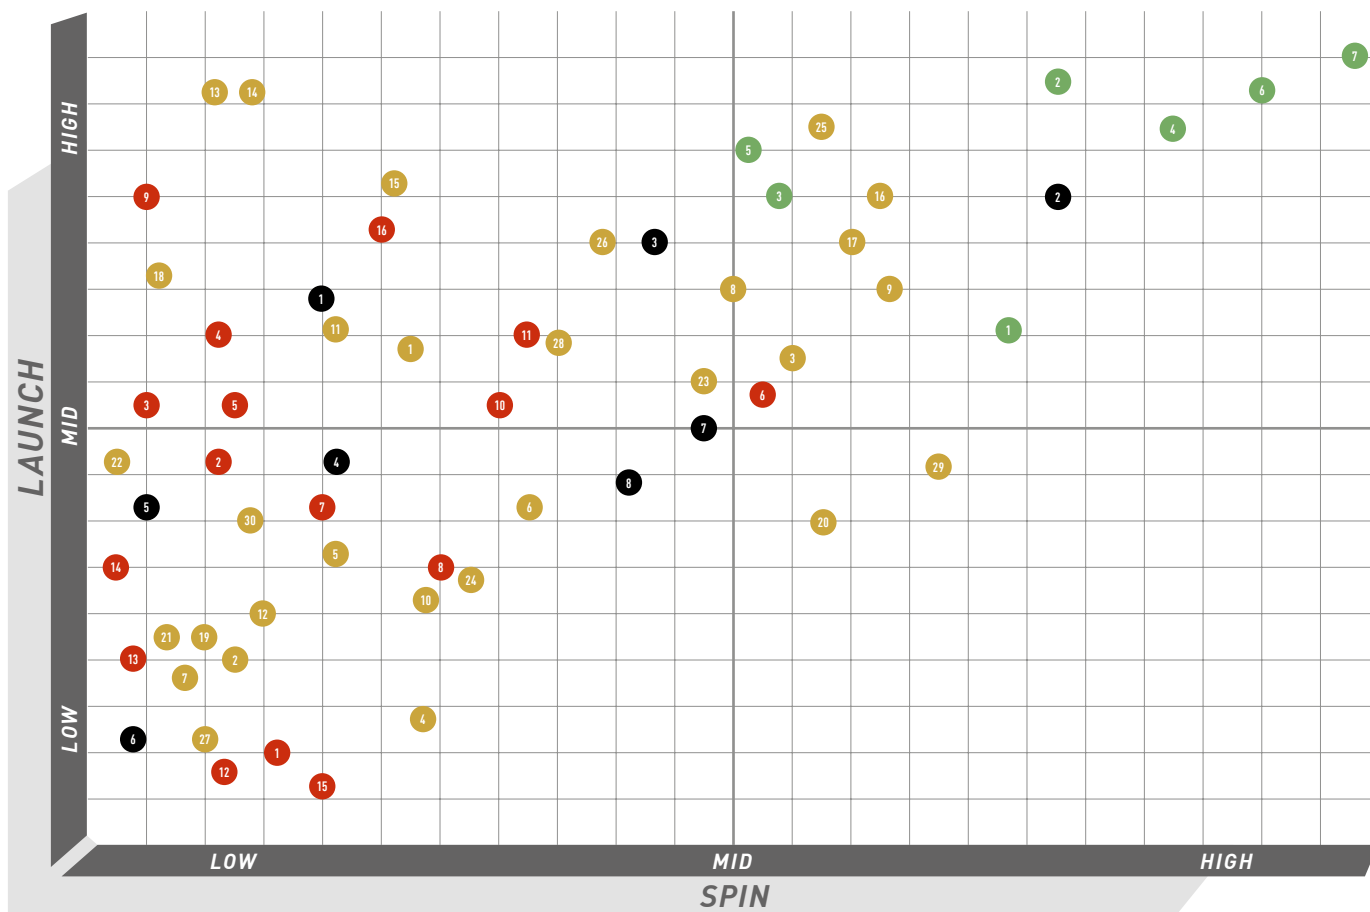

The Recoil 460 and 450 ES iron shafts are a lightweight structure, designed to provide higher initial trajectory and maximum distance. Recoil Technology provides optimal spring effect in the walls of the shaft and more efficient energy transfer to the ball for increased velocity and greater distance.

PISTOL GTR

The Pistol GTR features a classic pistol shape that golfers love. The Pistol GTR grips feature No Taper Technology as well as CROSS-TRACTION™ surface texture to help with a smooth, consistent, and reliable putting stroke. We are offering this grip in a Red, Silver and Black.
