

RAYLOR®

*The Ultimate  
Weapon for  
Escaping the  
Rough*

FEATURE	BENEFIT
Taylor® sole design shaped like a ship's hull	Glides through tall grass instead of stalling; easier to hit from sidehill lies
V-shaped leading edge	Slices downward through rough to promote clean face-to-ball contact
Compact from heel to toe	Smaller head size offers less resistance from thick lies
Super-low CG with 41% deeper face	Helps get the ball up and out of rough on a high, long-carrying, soft-landing flight
RE*AX® 65-gram graphite shaft 1" longer than standard TaylorMade® hybrids of equal loft	Promotes greater leverage from rough, clubhead speed and distance
Two lofts – 19° and 22°	Meets a wider range of distance needs
