

## The New Rossa<sup>®</sup> Ghost Series Alignment Made Easy

Our goal with Ghost was simple: Design a putter that's easier to aim than any other. That's where the white head comes in. Ghost's "golf-ball white" color complements the white color of the ball, and also stands out easily and beautifully against green grass so you don't have to strain to see the topline. That takes the strain off your eyes and promotes a calm and confident state of mind, according to an expert in the field of color perception, who we consulted during the development of Ghost. The three black lines on the crown lend further alignment support. The two outer lines are spaced as far apart as the width of a golf ball. Position the ball between those lines when you address your putt -- you'll be amazed at how easy it is to tell where the face is aiming. The elevated crown merges seamlessly with the top of the putterface, making the topline extremely easy to see.

The circular hole at the rear of the putterhead works in union with the three black lines on the crown and the golf ball to create a vivid secondary alignment aid that gives you complete assurance that your aim is true.

Rossa's renowned AGSI®+ (Anti-skid Groove System Insert) promotes forwardspin for a smooth roll, while its Titallium™ construction delivers soft and satisfying feel at impact.
