

FOR HIGHER-SPIN PLAYERS

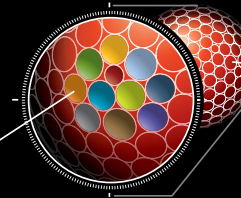

Next Generation NdV4 Core Technology

Low compression / neodymium-based core compound boasts softer feel yet generates higher COR for faster ball speed and increased yardage.

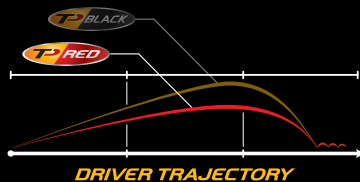

LDP (Low-Drag Performance)

Several dimple designs, arranged in a low-drag symmetry, promote improved distance on off-center hits. **How?** On low-spin, off-center hits, LDP maintains lift to minimize distance loss.

360 Dimple Configuration

360 dimples are configured to promote mid-to-lower flight; to limit drag for increased hang-time and distance; and to deliver extraordinary stability in crosswinds and headwinds.

Controllable Spin Off Short Irons

Superior Cast Thermoset Urethane and shear-resistant cover works with the Feel Mantle to generate controllable short-iron and greenside spin, plus softer feel than ever.

NdV4 Core unlocks faster ball speed and increased distance

Distance Mantle boosts COR and initial velocity

Feel Mantle softens impact feel and enhances spin control

Cast Thermoset Urethane Cover the tour standard for predictable spin and supreme shear-resistance
