

P.760

NEXT GENERATION FORGED PROGRESSION

With P760, we set out to design an iron for Tour-level competition, combining all the elements that are most desirable to the better golfer. P760's progressive set shaping enables short irons to be compact and precise while the long irons take on a hollow construction, injected with our revolutionary SpeedFoam. The result is a complete players set, designed to inspire confidence whether you're attacking pins from short range or sticking greens from long range.*

BRIAN BAZZEL | VP PRODUCT CREATION

Forged Multi-Material Construction

- Forged 1025 carbon steel body provides a soft feel with precise shaping
- New, lighter SUS630 face with Inverted Cone Technology in 3-7 irons creates additional speed, accuracy and playability

Progressive Players-Iron Shaping

- Hollow cavity construction (3-7) produces consistent distance while adding forgiveness to maintain optimized gapping throughout the set
- One-piece forged construction in the short irons (8-A) results in exceptional feel and enhanced shot-making ability
- Head size, offset, and lofts have been engineered to provide exactly what better players require for precise shotmaking
- Redesigned sole geometry with a chamfered leading edge provides improved turf interaction and a square look at address

SpeedFoam™ Technology

- Injected into 3-7 irons to dramatically enhance sound & feel
- SpeedFoam supports a thinner face to generate ballspeed and consistent performance in the mid and long irons
