

Spider X

ENHANCED STABILITY YOU CAN SEE

The X Philosophy

- Spider X revolutionizes the way we achieve optimal stability and alignment by re-engineering the mass properties of the head and introducing a new optically engineered True Path Alignment System.

Increased Stability

- Spider X features a redesigned head with a steel frame that is 30% heavier to minimize twisting

The X Design

- New True Path Alignment System helps visualize the intended target line for improved putting accuracy
- Spider X improves mass properties and stability by utilizing a heavy 320g frame with extreme perimeter weighting

Redesigned Weight Ports

- Redesigned weight ports (2g, 6g, or 12g) enable personalization of feel and stability

SHAFT	FINISH	TAYLORMADE HOSEL	HAND	SIGHTLINE	TOE HANG	OFFSET	LENGTH	HEAD WEIGHT	LOFT	LIE	PURE ROLL INSERT	INSERT FEEL
