

EXPLOSIVE DISTANCE, MAXIMUM FORGIVENESS

At TaylorMade, we have always strived to push the performance envelope to give players maximum distance and forgiveness in our game-improvement irons. Our new Speed Bridge technology allows us to do exactly that while improving sound and feel at the same time. Distance has never felt as good as it does with the M6 irons."

Matt Bovee | Senior Manager Product Creation

MORE SPEED WITH SPEED BRIDGE™

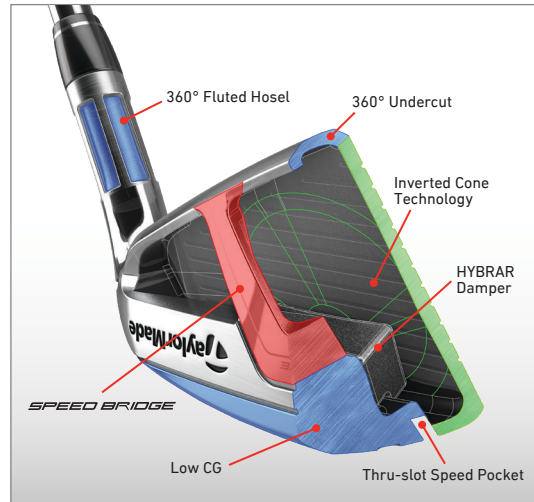

- New Speed Bridge structure unlocks the ability to use our most flexible thru-slot Speed Pocket™ engineered to generate more ball speed than ever before
- Additional stiffness in the head structure provides higher ball speeds due to reduced energy loss at impact
- An ultra-thin face design with Inverted Cone Technology (ICT) delivers incredible ball speeds over the entire face area

IMPROVED SOUND AND FEEL

- Speed Bridge supports the topline to reduce low-frequency vibrations for a more satisfying sound at impact
- Advanced HYBRAR compression damper effectively filters unwanted face vibrations for a soft and solid feel on all shots

OPTIMIZED FOR FORGIVENESS AND PLAYABILITY

- Fluted Hosel and 360° undercut effectively lowers CG to increase launch angle and ball speed to generate a strong, penetrating ball flight even on low-face impacts
- Patented off-center Inverted Cone Technology maximizes sweet spot and promotes straighter shots for golfers at all levels
