

THE SPEED OF LITE

“With a hybrid club, playability, distance, and forgiveness are absolutely essential. M Gloire Rescue delivers this through a new combination of our premium Asian market “Gloire” product line and our Tour-proven M products. When premium, lightweight components and Twist Face technology come together, golfers will experience a unique hybrid club that produces speed and accuracy unlike any other club in this category.”

Daisuke Takaesu | Asia Product Manager

MULTI-MATERIAL CONSTRUCTION

- Multi-material construction allows for precise CG control, creating a hybrid that is easy to launch, extremely versatile with a powerful draw-bias trajectory
- Carbon fiber sole and crown (in a TaylorMade Rescue for the first time) help create one of our lightest rescue heads ever, saving 10g of weight
- Silver carbon fiber crown and graphic treatment create a premium and striking look that breeds confidence

COMPLETELY OPTIMIZED FOR SPEED

- Each component was individually engineered to create the total performance package for speed and low static weight
- Head: Ultralight design with progressive aerodynamics
- Shaft: Fujikura Speeder Evolution, designed to meet the optimal weight and performance requirements needed for maximum speed
- Grip: Lamkin GENESIS material for additional weight savings and exceptional all-weather performance

PREMIUM TECHNOLOGIES

- Twist Face™: C300 stainless steel, Inverted Cone Technology™ and Twist Face all work together to provide additional accuracy and speed
- Speed Pocket™: A long, open-channel Speed Pocket creates additional flexibility for added ball speed protection on off-center strikes
- 180° Fluted Hosel: Helps lower CG while maintaining a seamless look at address
- Larger Head Size: Provides added playability and forgiveness from long range and a confidence-inspiring alternative to long irons
