SPIDER STABILITY SQUARED

Spider

SPIDER STABILITY SQUARED

| FEATURE | BENEFIT |
|-------------------------------------|--|
| Multi Material Construction | The use of high grade 6061 aluminum body matched with tungsten sole and rear weight bar |
| Tungsten Weight Bar | Adjustable tungsten weight bar customized for each shaft length and used on TOUR to provide different head weights and MOI characteristics |
| Tungsten Sole Weights | 48 gram tungsten sole weights positioned on the front of the left and right side for stability |
| Our Highest Stability Spider Putter | The combination of the tungsten weight bar and sole weights provide deep CG and high MOI |
| KBS Stepless Stability Shaft | New black single bend CT Tour putter shaft for less deflection |

| SHAFT | | | | | | | GRIP | | | | | |
